Evaglide Curtain Engineering

Evaglide tracks are manufactured from powder-coated aluminium to ensure low maintenance and performance longevity; the systems can comfortably support heavy weight drapes such as full height interlined curtains.

Simple installation and maintenance make it ideal for hotels, motels, offices, schools, hospitals and private homes. The Evaglide tracks are reverse bendable around any bay window without creasing. Available in hand-drawn or corded versions, all of which are performance guaranteed.

If required we will manufacture the track and deliver to site for your convenience. To obtain a quote, please photocopy the ordering sheets contained within the price list.

Alternatively you can save costs by assembling your own tracks. Consider the savings by comparing the components and tracks price in the starter pack guide.

The Ripplefold design option allows you to manufacture a curtain which arrives on site ready to be hung with the minimal of dressing to produce the perfect pleat. Ripplefold can be used with any of the Evaglide profiles.

An Evaglide panel system is a contemporary solution for floor to ceiling windows and patio doors. For your convenience we can offer the full bespoke manufacturing service including the laminating your fabrics.

Evans Textile Wholesale stock Rufflette products for distribution. We offer single items per outer. If you require branded Rufflette products please request a current Rufflette price list and deduct 35% off the list price ex VAT.

PRODUCT INFORMATION

- Highly efficient hand drawn system for all types of medium weight draperies.
- Quick installation with "Smart Klick" brackets for wall and ceiling applications.

- Bendable; it can be curved and reverse curved using a 10cm radius or continuously curved.
- Suitable for special window decoration as circular, arch and triangle window models.
- Heavy duty klickable carriers - UV protected - for smooth and easy traversing. Offset shape for straight hanging pleats.
- Can also be used for ripplefold.
- Maximum fabric weight: 4 kg per metre.
- Track finish: chromated powder coating with a factory applied patented dry lubricant.
- Limited lifetime warranty.

BENDING/CURVING

The track can be curved and reverse curved using a 10cm radius. Continuous curving can easily be done using the continuous curver. Also the possibility of curving for special windows, such as arches, bows and circles.

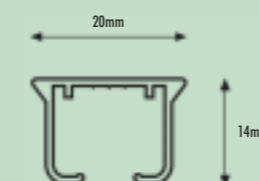

Evans offer a made to order service.

Bending instructions available on request

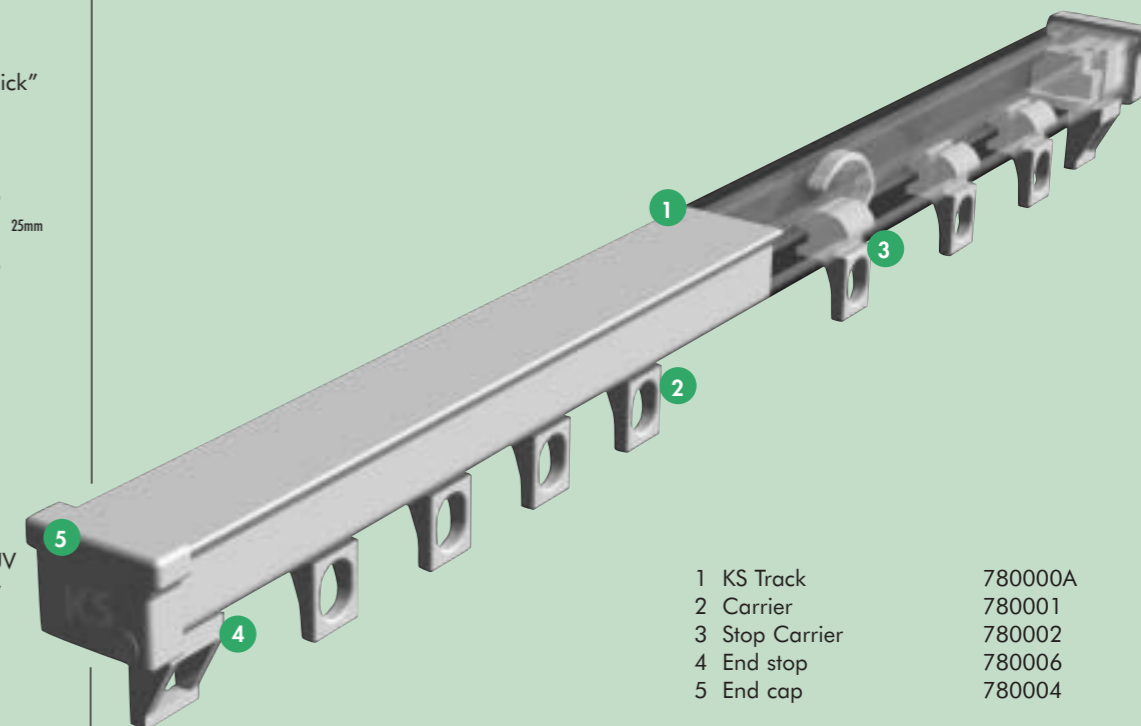

PROFILE

Weight: 150 grams per metre
Dimensions: 14mm x 20mm

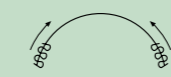

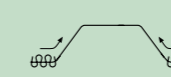

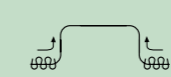

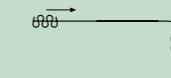

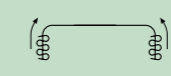

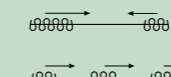

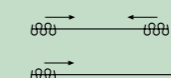

FOR USE IN

Hotels - offices - schools - healthcare - residences - boats - homes - planes or anywhere an efficient hand drawn system is required.
