

Don't lose any
sleep over daylight,
noise or warmth

AT A GLANCE

- Ivory Blackout now available to co-ordinate with Ivory curtain linings

- Twilight Woven Blackout in white for reducing pin holes on Roman Blinds
- Twilight Coloured Blackouts in 15 shades

Blackout and Thermal Linings

There was a time when blackout linings were sold only to keep sunlight out, but there is now a range of great reasons you should be recommending them to your customers.

Evans blackout linings are designed to not only provide total darkness, but also offer excellent sound insulation, energy saving and thermal properties.

Keeping sunlight out of bedrooms is great for customers with young children who have trouble sleeping during the summer, or for people who work nightshifts and need to sleep during the day. We live in an increasingly noisy world, so the sound insulation properties of blackout linings bring your customers peace and tranquillity. And with people's growing awareness of the environment, upgrading to a lining that provides energy saving and thermal properties is well worth considering.

- 100% blackout
- Sound insulation properties
- Energy saving and thermal properties
- Washable and dry cleanable
- Protect fabrics and furnishings from fading

We're the people behind a better night's sleep

BLACKOUT AND THERMAL LININGS
