BLIND SYSTEMS
CHILD SAFE BLINDS - AVOID EXPENSIVE CALL OUTS

CHILD SAFE BLINDS

NEW MAKING METHOD FOR CORD BREAKAWAY DEVICES

- 76444 can be used with eyelets and rings, attached to bottom two the pockets with a discreet cable tie
- 76666 can be used with Roman Blind tape and clips securely to the bottom two pockets
- Both can then be used with a 76334 Toggle, used to level the blind.
- The knot below the toggle prevents the cords slipping or heavy handed customers winding the cord into the headrail
- Click on the video link above for making instructions for the 76444
- Avoid expensive call outs to repair blinds by using either of these new options , both fully certified by Bureau Veritas

910031 - CHAIN BREAKAWAY OPTION

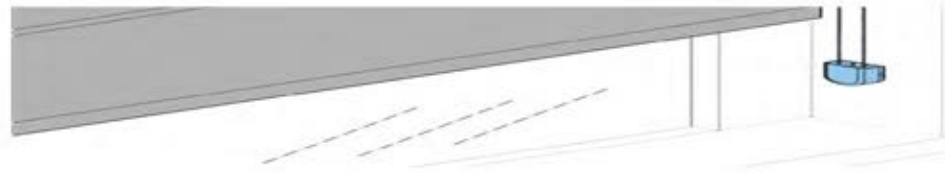

- 910031 are supplied FOC with all M2M options and can be purchased in packs for use with Set Size Evans Blinds
- 910031 offers a 6kg load weight from the control unit, however the chain will break if pulled with excessive force
- 1:1 Controls offer a cost effective solution and avoid shorter chains

BLIND SYSTEMS
CHILD SAFE BLINDS - BS PREMIER

CHILD SAFE BLINDS

910080 BS PREMIER 1:4 CONTROL UNIT WITH INTERNAL BREAKAWAY AND A FULL 7.5KG LOAD

- BS Premier has the internal breakaway housed within the control unit (black arrow)
- Chains can be 60cms from the floor, no safety box or chain breakers needed
- A full 7.5kg load weight
- Smooth 1:4 ratio gearing
- Available M2M or in components
- 910080 are supplied as standard with all BS Premier M2M options and can be purchased for use with other Evans Romans

CHANGES TO THE RATIO OF CORDS SPOOLS IN EVANS M2M BLINDS

1 Every
40cm + 1

- The number of cord spools on M2M BS Premier and BSXL Romans have been increased
- There will now be 1 spool every 40cms plus 1
- Examples - A 130cms blind will have 4 and a 160cms blind 5
- The number can be reduced at order stage if you are happy with the previous 1 every 50cms plus 1 calculation

WHY CHOOSE EVANS BATTERY BSXL ROMANS

Battery Romans are not new to the market place, we ourselves offered them in our 2010 brochure.

Sadly the performance did not live up to our expectations and they were quickly withdrawn from the market. Load weights, battery life, remote controls losing pairings and noise were all problematic. We have therefore extensively tested this new product to the maximum to ensure the performance will meet your needs, hence the 5 year market leading warranty.

*For heavier Romans we also have the BCS profile for loads from 13kgs to 26kgs, see page 055 of the 2015 brochure.
